## Leisure Sector Challenges

The leisure industry is rapidly changing and becoming highly competitive. Leisure centres and health & fitness clubs, all have to compete with, and differentiate from, a constantly growing number of leisure options available. All leisure centres, health & fitness venues are constantly re-thinking the ways they can attract and delight their customers, in order to build a loyal base. This includes providing better facilities by either building new or transforming the existing ones.

## Athena Range

### Secure, Robust, Practical and Flexible Locker Solutions

#### Athena Leisure Range

The new Athena lockers were created specifically for the leisure industry, combining security with strength and practicality. The Athena range comes in two design concepts meeting the distinct demands of the sector. They are perfectly suited for swimming pools projects, where resistance to vandalism and ease of maintenance and cleaning are important, as well as health & fitness changing rooms, where quality and aesthetics are the key selection criteria.

The Athena Range performs well in 'wet areas' where lockers are exposed to a wet or humid atmosphere such as swimming pool and spa changing areas. However, they are equally suited for dry environments like health & fitness clubs or sports clubs.

These robust and elegant lockers are available in a wide range of colours, they are constructed with aluminium bodies for durability and practicality, complemented with solid grade laminate doors and internal high impact polymer shelving.

## What makes Garran Leisure Solutions different?

- 50 years of experience in locker manufacturing
- Innovative and practical design
- Quality finishes
- One-stop solution
- Design and installation expertise
- Country-wide delivery

## Athena Line Solution

Athena Line is the ultimate in design simplicity and purity. The plant on doors ensure that the smooth finishes are maintained throughout providing an elegant solution to meet the most demanding needs and design expectations.

Athena Line

## Athena Edge Solution

The Athena Edge Locker with its inset doors was created with additional security in mind. Special features have been built-in to support heavy utilisation and exposure to vandalism while ensuring that lockers are easy to maintain, clean and look presentable in very busy changing rooms.

Athena Edge

| Depth            | 500mm  |
| Locking Options  | coin operated, cam, hasp and staple, combination and digital |

## About Garran Lockers

Garran Lockers, one of the longest established businesses of its kind in the UK, have over 50 years experience in designing, manufacturing and installing traditional and bespoke locker solutions across many sectors.

Their leisure sector clients include The Dorchester, Wembley Stadium, THORPE PARK, Chessington and Legoland among others.

A substantial investment in highly sophisticated machinery in 2009 marks the start of a new era for Garran. The introduction of the robotic CNC systems gives the company total control over production and quality, allowing Garran to exceed the expectations and needs of the most discerning clients in the leisure sector.

## Installation & Support

Garran Lockers are one of a few UK locker manufactures capable of offering a complete and tailor made service from design through to manufacturing and installation. Athena lockers are always provided on a supply and fix basis, backed by maintenance teams covering the whole country. Every installation comes with an after-care tool kit, maintenance instruction and training.
