

CLASSIC RANGE

MULTI - TIER LOCKERS

From a single tier to 10 tier

LOCKING OPTIONS

We offer a choice of locking options

COLOUR CO-ORDINATE

Mix and Match colours

Our flat top lockers have a spot-welded construction with a strengthened capped top. Sloping top lockers are all integral to the locker body and not just an addition.

Security is catered for by vertical door stiffeners and all locker doors are hung on 2 or 3 concealed hinges that are spot-welded but riveted to the carcass for ease of replacement.

Our unique base system minimises the contact with water used in cleaning processes and helps to prolong the life of the locker. Lockers are pre-pierced sides and back to facilitate the ease of installation.

Finally, our powder coating plant provides the finishing touch in one of our 19 colours or a corporate colour of your choice, depending upon quantity.

BESPOKE LOCKER SERVICE

If our classic range of lockers does not contain a solution to suit your needs, contact us as we also manufacture bespoke locker systems.

Sloping Top Lockers

Our lockers can have a sloping top to prevent placement of items above the storage area.

The sloping top is actually part of the locker side and not an unsightly attachment that sits on top. We feel this makes a better looking locker that looks professional and complete.

The overall height of the locker is increased slightly depending upon which locker you choose and it varies between an extra 100mm to 200mm. For this reason, clearance height needs to be checked to ensure that the locker will fit the storage area correctly.

Our free planning service will highlight any problems that are likely to arise and we can then, if needed, suggest alternatives, so please do not hesitate to contact us to discuss your project.

1 Tier Lockers

The 1-Tier Workplace Locker has a door height of 1708mm.

Fitted as standard with a top shelf for those personal effects with two fixed coat hooks in the lower section.

Lockers are 450mm and deeper or greater are fitted with a coat rail and one fixed coat hook.

The new one piece locker base is designed to give additional strength and also has the additional benefits of glides to protect the floor and allow a flow of air to assist drying under the locker.

The new top is cut to the precision we demand from the latest Amada Turret press and folded to give a clean crisp corner

New style vents in the top right corner of most doors. New for 2011 are four more perforation designs. Ask for details

The lock enclosure designed to fit a self adhesive number plate or your own name card can slide in to the holder

2 Tier Lockers

The 2-Tier Workplace Locker has a door height of 853mm and each storage compartment is fitted with 2 fixed coat hooks.

The Complete Locker Service

From consultation, measurement, planning, manufacturing, delivery, installation right through to after sales service, Garran Lockers take care of your storage project from start to completion and beyond.

If our standard range of lockers does not contain something to suit your needs then simply contact us as we also manufacture bespoke locker systems.

Fitting Your Lockers

Our professional fitters complete the package and install your storage solution to the very highest standard.

Colour Selection

The 19 carcass and door colour options leave you with a wide range of colour combinations. To help you make the right choice we can send actual painted swatches of our colour range.

Of course, alternatives to our standard colour range are available. If you would prefer the lockers in your corporate colour we can accommodate. When choosing alternative colours you need to be aware that replacement doors or lockers may become expensive after the initial order.

To discuss your colour options or request our painted swatches please do not hesitate to call us on Tel: 08456 58 86 00

10 Tier Lockers

Our 10-tier locker is available with a flat top and sloping top. This locker has 10 equal doors of 169mm high and comes supplied with no internal fittings.
