## AS AN ADDITION TO OUR EDUCATION LOCKER RANGE

Titan Locker doors and stiffeners are made from 1.2mm thick steel. Safety edged on 3 sides, these are nearly twice the thickness of a standard door. With the reinforced frame we offer a steel locker with greater strength and longer life

# THE TITAN RANGE

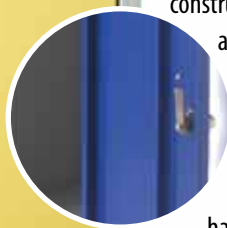

Titan Locker doors are manufactured with a 1.2mm stiffened door, with a reinforced frame and safety edged on 3 sides.

This is done by a 10mm flattened and safety edged support on all sides and now includes the top and bottom of the locker.

38mm divisions between tiers add to its new additional strength and security.

All our Titan Range of lockers have a spot-welded construction and if required offer a sloping top as an integral part of its construction not an additional feature, as are the strengthened capped tops on all our flat top lockers.

Add our strong vertical door stiffener and we have a locker door that has **MORE STRENGTH** is less susceptible to damage and vandalism than ever before.

# EDUCATION RANGE

## MIDI lockers

Available in 3 sizes and can be manufactured in heights of 1 to 5 and in widths of 1 or 2.

- No internal fittings
- All nests are pre-pierced at the sides and backs for fixing together

# Premier Range

Doors with steel carcass

This is a new range of lockers with Solid Grade Laminate (SGL) doors fitted to a steel carcass with a unique bolt through hinge.

This gives you a locker with the advantages of the extra strength and visual appeal of the SGL door combined with the strength of the spot welded steel carcass. The result is an extremely robust locker built to resist vandalism at an affordable price.

Available in the full range of standard sizes with a flat or sloping top. The sloping top is an integral part of the locker not just an addition.

- 1 Spot welded carcass construction
- 2 Strengthened capped top on all flat top lockers
- 3 This locker has 10mm flattened and safety edged door stops on each side and 38mm divisions between tiers which provides additional strength and security.
- 4 Doors are made from 10mm Trespa in a selection of colours from the 'Trespa Athlon UK Stock Range'.
- 5 The unique base reduces floor damage and minimises contact with any water used for floor cleaning.
- 6 Carcass in any of our 19 colours.
