

# EMERGENCY SERVICES

Our Emergency Services range includes lockers designed to provide specific storage solutions to meet the needs of their demanding roles.

## **TIERED LOCKERS**

2,3,& 4 Tiers in a full range of sizes

## **FIREMANS BOOT SEAT**

Especially for the Fire Service

## **EQUIPMENT LOCKERS**

Designed for more storage

## **AIRWAVES RADIO**

Where space is at a premium

## **DRYING RACK**

Coat Rail for damp clothing

From the very large, 750mm wide two door locker, through the standard 600mm x 600mm kit locker to the smaller bespoke airwaves radio lockers; and add our range of bright zinc wire mesh lockers and this brochure now offers the largest selection of storage solutions for the emergency services.

Manufactured in 0.65/0.75 prime mild steel our lockers have a spot welded construction for maximum strength and rigidity and our designs offer a sloping top as an integral part of its construction not as an additional feature, as are the strengthened capped tops on all our flat top lockers. All the doors have vertical door stiffeners and a unique strengthened base to minimise damage to the floor covering and contact with water through cleaning processes and you have a locker that's built to last.

The lockers in this brochure are specifically for use in the emergency services, for details of other types of lockers please call us for our product literature.

## Locker & Blanket Box

Locker & Blanket Box			
HEIGHT	WIDTH	DEPTH	REF NO.
1800	450	450	F180454511
1800	450	525	F180455211

1800	525	600	E180526011	2000
1800	600	600	E180606011	2000

## Drying Rack

A drying rack with a coat rail to hang damp garments on and a rack below for storage of boots etc.

A CS gas canister holder is fitted to an airwaves radio locker door. This holder with a viewing hole can be incorporated as an integral part on most of our locker doors.

## Airwaves Radio Lockers

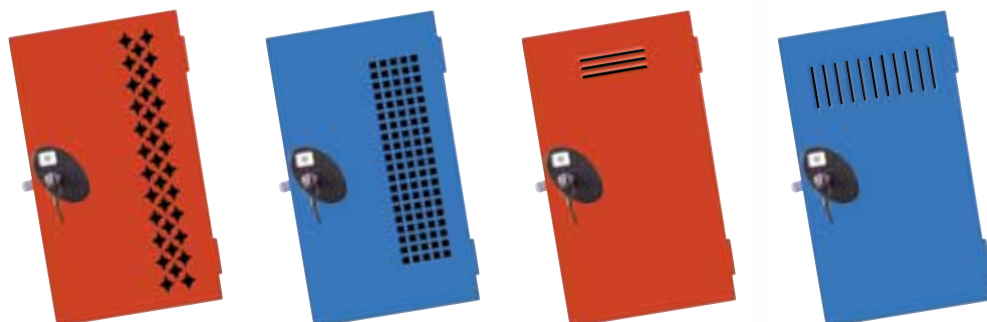

Designed specifically for the use of police forces to store airwaves radios. The specifications of this locker are flexible to suit individual needs.

Options available:

- CS gas canister holder fitted to door
- Viewing hole on door for stock management and security

Below are examples of different perforations that we use with various standard lockers in this range.
