

All colours can be applied to doors and carcass

Painted swatches on request

Corporate and special locker colours*

Anti-bacterial Powder Coatings

* Dependent upon quantity.
* Please be aware that replacement doors or lockers may become expensive when non-standard locker colours are chosen.

Colour Selection Chart

Anti-bacterial Powder Coating

Our steel lockers are finished with an Anti-bacterial Powder Coating (A.B.P.), tested to the highest standards. This treatment is ideal for areas that are susceptible to bacterial infection such as hospitals and food services and is available in most of our colours.

*Anti-bacterial Powder Coating not available in these colours

Attention to Detail

As well as providing strong and secure lockers in a wide range of size and door combinations, Garran Lockers take care in the detail of the finish so that your storage area looks good.

If our standard range of lockers does not contain something to suit your needs then simply contact us as we also manufacture bespoke locker systems.
