Siamese Lockers

Designed to provide a useful facility for two people to access sections of the same locker. Each locker user has full access to both a top and lower compartment and an additional operative has only limited access to the top section.

This is useful in situations where operatives require access to a users laundry for cleaning.

Top Compartment

- 200mm high door – 280mm high on Tall Siamese Locker
- No internal fittings

Lower Compartment

- Coat rail
- Coat hook
- Locks paired with one top compartment each

SPECIALIST RANGE

VISTA Visibility Lockers **NEW**

Designed to allow high visibility whilst retaining the doors strength. Ideal for security reasons and easy stock management.

- 1.2mm thick doors (twice the thickness of standard doors) plus strengthened pillars
- 6mm Plexiglass is bolted to the locker door

Perforated Door Lockers

Designed to uses in situation where damp clothes, odour's or security issues pose a problem.

- Available on most of our standard locker range as an option
- Perforated locker bases, shelves and divisions are also available
- Supplied at an additional cost to the locker price

Workwear Workplace Lockers

Top Compartment

- 250mm high top compartment
- No internal fittings
- Locks into lower door
- Accessible to user and laundry operative

Lower Compartment

- 250mm high fixed shelf
- Coat rail
- Coat hook
- Accessible only to user

Designed to provide a sensible storage solution for a combination of work wear clothing, equipment and/or personal affects.

The main user would have access to both compartments and an additional operative would have access to only the top compartment. This is useful in situations where the main user would leave items for cleaning in the top compartment for a laundry operative to access.

Garment Dispenser and Collector Lockers

Can be used as separate units or combined to provide a system for the laundry operative to dispense garments and the workforce to collect laundered garments. The garment collector has a flap top to collect soiled garments in a laundry bag held inside the unit. (Laundry bag not supplied) Both lockers are available with a integral sloping top as illustrated.

Garment Dispenser Lockers

Designed for the laundry operative to dispense garments.

- Available with 10 doors
- No internal fittings
- Main door frame is hinged to allow access to all compartments
- Individual compartment doors are 1.2mm thick and are piano hinged
- Supplied with locks that differ

Garment Collector Lockers

Designed with a flap top to collect soiled garments in a laundry bag held inside the unit.

- 6 internal hooks to support laundry bag (not supplied)
- Inward opening flap
- 2 locks for additional security
- Main door locks are paired with main door frame lock on Garment Dispenser
